Conclusion of the Project

"Ultimately,this project demonstrates how can convert raw,dense student placement records into an interactive,actionable data story.By structuring the model to respond seamlessly to user input across multiple slicers,i have ensured decision makers aren't just looking at where the institution stands as whole,but can instantly drill down into the exact insights they need to drive future academic and placement strategies

Thank you, and i would be happy to take any questions on the data model or the dashboard's functionality".
